

## **Environmental policy Monier Nordic & Baltic**

Monier stands for long lasting products made from natural raw materials. We offer and develop roof products that help the consumer make energy- and environmental improvements. We constantly strive towards minimizing our own impact on the environment, in everything from the choice of materials to production and transport.

We strive actively and target oriented towards reducing our environmental impact by:

- choosing logistics partners that minimize toxic emissions through the selection and use of their fleet.
- promote a product range to minimize the environmental impact.
- promoting to stimulate, inform, engage and educate employees to change attitudes and behavior.
- actively work to keep down energy waste and yearly decrease the total energy consumption per produced entity.
- fulfill all legal standards that can be referred to environmental aspects.

The purpose with our environmental work is that the public and employees see Monier as a conscious, responsible and engaged company and that our customers always feel safe in their choice of Monier products.
